- **Local and international partners network** to meet your most specific needs.

Customer Success Management

Customer Success Management to Guarantee the Day-to-day Performance of Your Monitoring System

At Centreon, we understand that every IT project is unique and requires a tailored approach. Proactive, dedicated, and knowledgeable, our team works alongside yours to ensure the success of your monitoring. We make sure that your needs are promptly addressed, that your projects progress efficiently and that future requirements are anticipated.

Always-On, Customized Support for Achieving Operational Excellence in Your Business.

Customer Success Management

The CSM understands your immediate and long-term goals and finds the path forward that meets your constraints and requirements.

Technical Account Management

The TAM accelerates your time-to-value by assisting in documenting, maintaining, and using your Centreon Platform.

Expertise Centreon

Access to Centreon internal teams that can be called upon to help with complex technical subjects and/or issues (R&D / Product / TSM...).

Key Benefits

A single point of contact centralizes and follows up on your requests with Centreon teams to guarantee the best level of response in the shorter time possible.

Customizable follow-up and advice: your CSM representative understands you and cultivates a privileged relationship with your teams. They provide recommendations based on our best practices and anticipate your needs. They follow up on your open tickets with Customer Care, escalating where necessary.

Proactivity and proximity: your CSM representative consistently updates you on changes to the product roadmap, involves you in product developments with exclusive access to beta tests, UX/UI considerations and strategic discussions, and integrates your needs into Centreon's long-term vision to foster a lasting and fruitful collaboration.
